

# CleanStation®

"First Choice of FDM Professionals"

# DT3™

***The CleanStation DT-3, the "original" desktop system, is installed in thousands of offices and classrooms worldwide.***

All CleanStation Support Removal Systems are made in America and utilize US patented "Heat, Agitation, and Flow" technology to rapidly dissolve soluble support material from FDM parts and models.

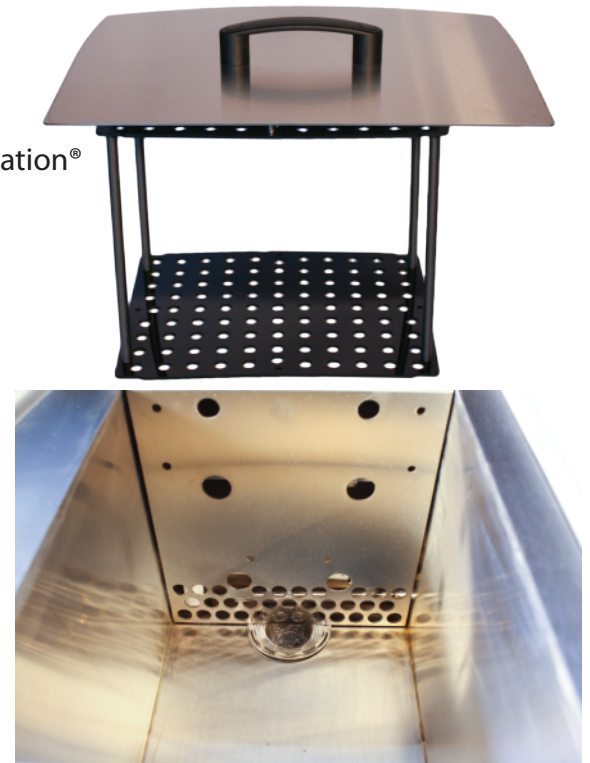

Although factory configured for "one touch" operation, the DT-3 is fully programmable for time and temperature. Additional features include a recessed, "no drip" top, integrated basket/lid, "whisper quiet" operation and a low solution level cut off for unattended operation.

***Soluble Support Removal for Dimension 768 Series, 1200es Series, Elite Printer, and Fortus 200MC***
